

SUFFERING FROM LOW BACK PAIN?

Supporting the lower back through bracing has been proven to reduce pain, improve functional status and lower the need for medication.¹

“I had no pain all day with this brace.”

GARY A. — Patient

THE BENEFITS OF USING ASPEN BRACES

Targeted upper and lower compression delivers localized support where needed. Physical Therapy (PT) patients using an Aspen brace were 4.7 times more likely to have a significant improvement vs PT only patients.²

ASPEN BACK BRACES FEATURE

- › Non-narcotic, non-invasive treatment option
- › Low profile design that fits under clothing
- › Eases pain associated with muscle spasms
- › Comfortable, lightweight and breathable materials
