ASPEN MEDICAL PRODUCTS LAUNCHES A NEW LINE OF LUMBAR SUPPORT ORTHOSIS

The Elite Line is designed to provide pain therapy while providing effective compression

IRVINE, CA – January 2018 – Aspen Medical Products, the leader in the design, development and marketing of upper and lower spinal orthotics, recently launched the Aspen Elite line of braces. The line utilizes innovative knit materials and a design focused on pain therapy settings where patients may require trunk stability as a focus of treatment.

“In 2016 Aspen opened the office in Germany to support direct sales.” Jared Milewski, Senior Product Manager. “This is our first line of products designed specifically for the German market place.”

The Aspen Elite line is the first line developed specifically for Europe. It has been designed to provide a more intimate fit as Aspen’s first knitted braces. Rather than layering materials on top of each other, materials are woven with thread, offering variances in elasticity and density within one piece of cloth. The knit material provides a closer fit for the patient while maintaining the therapeutic benefits for which Aspen products are known.

For more information on the Elite Line, please contact Jared Milewski at 203-887-3456 or jmilewski@aspenmp.com.
