ASPEN MEDICAL PRODUCTS REDESIGNS THE VISTA LOWER SPINE LINE

New enhancements offer improved comfort, fit and performance

IRVINE, CA – May 2018 – Aspen Medical Products, the leader in the design and development of spinal orthotics, launched a redesign of its popular Vista Lower Spine Line. Utilizing all of the same innovative and foundational pieces unique to the original Vista Line, these improvements help to make the new line one of the most advanced on the market.

“The newly integrated enhancements offer improved comfort, fit and performance in a lower profile design.” Jared Milewski, Senior Product Manager. “Featuring a modular and versatile design, Vista provides adjustability and a high level of postoperative support with a unique ability to be stepped down as the patient improves.”

Aspen employed customer feedback to ensure only the best possible changes were implemented. Improvements focused on ease of use for practitioners and patients as well as longevity of the product. Such improvements were important to ensure that patients and providers receive the best brace from Aspen.

The Vista Lower Spine has been approved by PDAC for following HCPCS codes:

- L0627 / L0642
- L0631 / L0648
- L0637 / L0650
- L0639 / L0651
- L0464

For more information on the Vista Lower Spine Line, please contact Jared Milewski at 203-887-3456 or jmilewski@aspenmp.com.
